MUKESH KUMARAN M

Undergraduate Student | Software Development • AI • Cybersecurity

ABOUT ME

Motivated undergraduate student interested in software development, artificial intelligence, cybersecurity, data science, and modern computing. Builds practical solutions through hands-on projects, technical learning, and industry certifications. Has worked on a live commercial e-commerce website and a governance-monitoring platform for the Smart India Hackathon.

– Tamil
– English

PROJECTS

Srinivasa Textiles — Commercial E-Commerce Platform
Developed a live commercial website for Srinivasa Textiles, a family textile brand established in 1978. Features responsive catalog browsing for silk sarees and family wedding combos, Silk Mark certification branding, and customer order inquiries.
Focus: Responsive web development, e-commerce, product catalog experience.

Prahari — Smart India Hackathon (SIH) Governance Portal
Team project that successfully advanced to the next stage and is actively in progress. A transparent MPLADS governance and expenditure monitoring platform with separate workspaces for MPs, Authority Board, officers, and the public, plus geo-tagged evidence tracking and AI anomaly detection.
Focus: Role-based access, governance transparency, geospatial evidence, AI-assisted monitoring.

TECHNICAL EXPERIENCE

Self-Learning & Personal Projects | 2025–Present
– Developing practical skills through independent learning and software projects.
– Exploring Python, Java, MySQL, AI fundamentals, system architecture, and code analysis.
– Strengthening knowledge of modern software development and cybersecurity concepts.

SKILLS

– AI Fundamentals
– Data Science Fundamentals
– Python Programming (Advanced)
– Java Programming (Advanced)
– C Programming (Advanced)
– MySQL Architecture (Advanced)
– Advanced Computing
– System Architecture
– Code Analysis
– Problem Solving
– System Optimization
– Continuous Learning

PROFILE

Undergraduate student with interests in AI, software development, cybersecurity, databases, and system architecture. Practical experience through personal projects and collaboration on a Smart India Hackathon project. Completed 29+ industry certifications.

INTERESTS

– Artificial Intelligence
– Software Development
– Machine Learning
– Data Science
– System Architecture
– Database Systems
– Cybersecurity
– Open Source & Modern Computing

CERTIFICATIONS

DATA SCIENCE AND ANALYTICS
CYBER JOB SIMULATION EXPERIENCE
PYTHON, JAVA & MYSQL
Google Developer Community Participation
Microsoft Applied Skills: GitHub, Copilot, AI Chat, AI Research
29+ industry certifications completed

PROFESSIONAL SKILLS

– English Communication
– Typewriting
– Critical Thinking
– Analytical Thinking
– Team Collaboration
– Time Management
– Continuous Learning
– Adaptability

ACHIEVEMENTS

– **29+ certifications:** Completed industry certifications across technical learning areas.
– **SIH project progress:** Prahari advanced to the next stage of the Smart India Hackathon.
– **Commercial project delivery:** Developed a live e-commerce platform for Srinivasa Textiles.
– **Cross-domain experience:** Worked across e-commerce and AI-assisted governance monitoring.
– **Developer community:** Participated in Google Developer Community activities.
